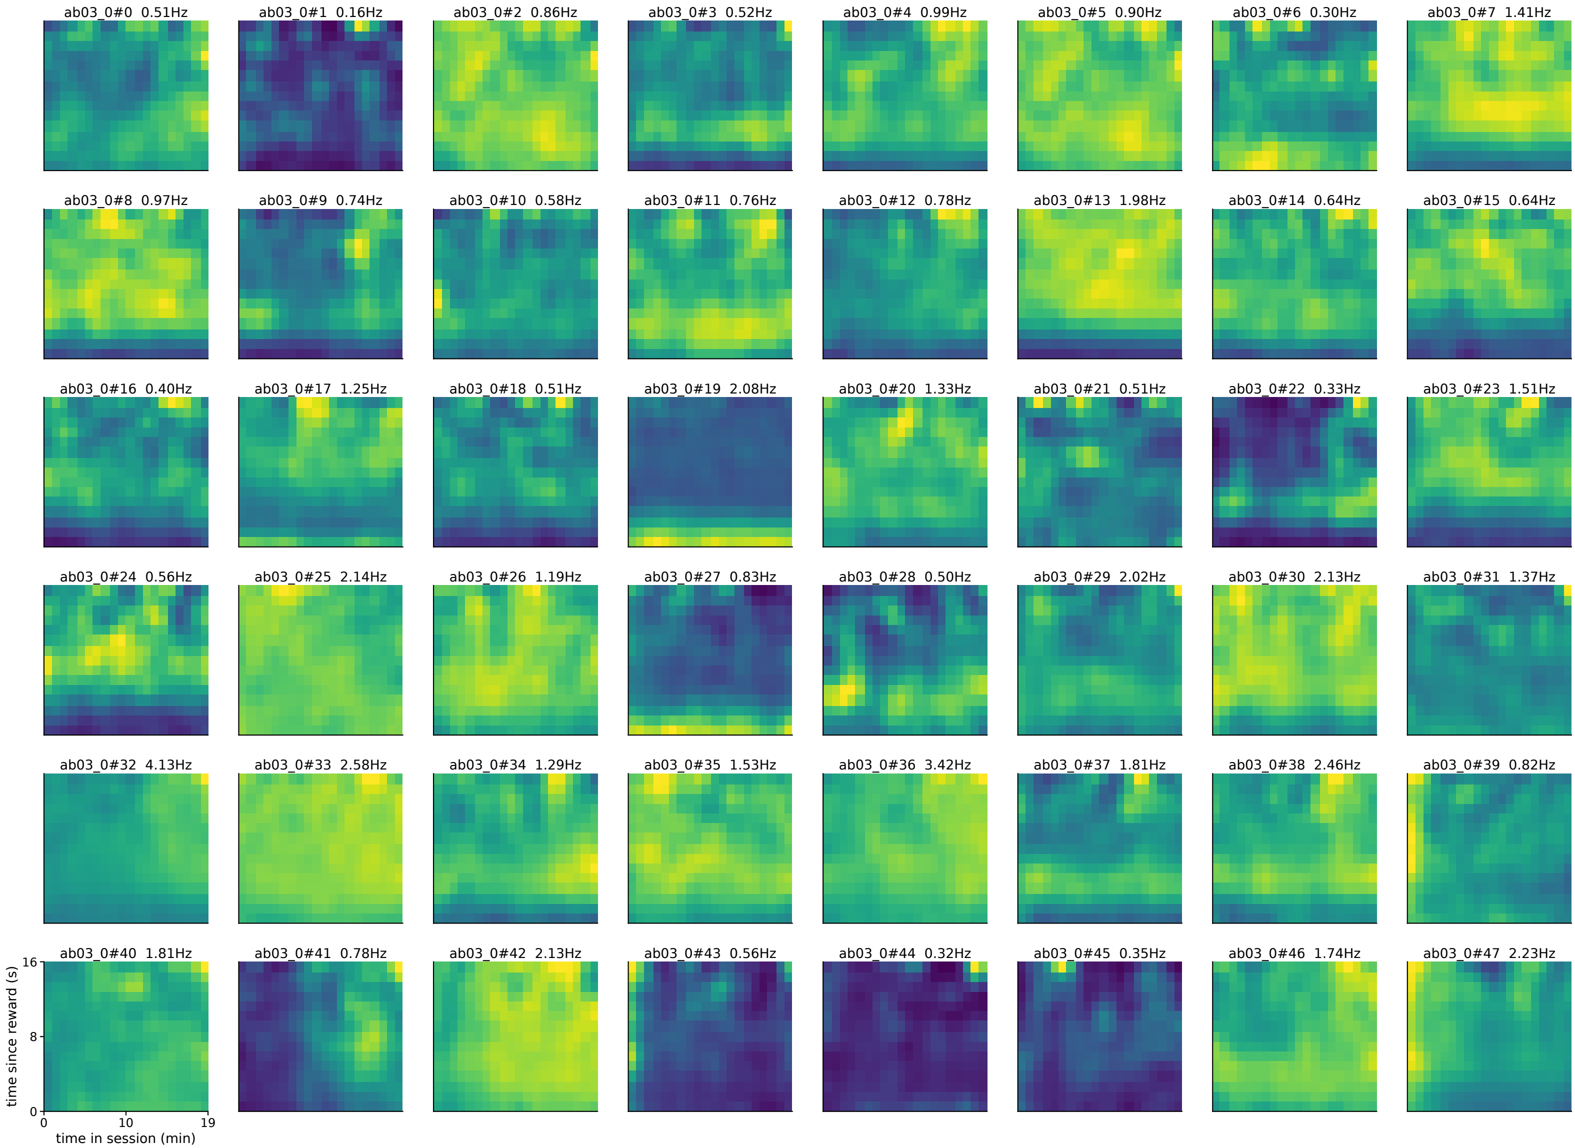
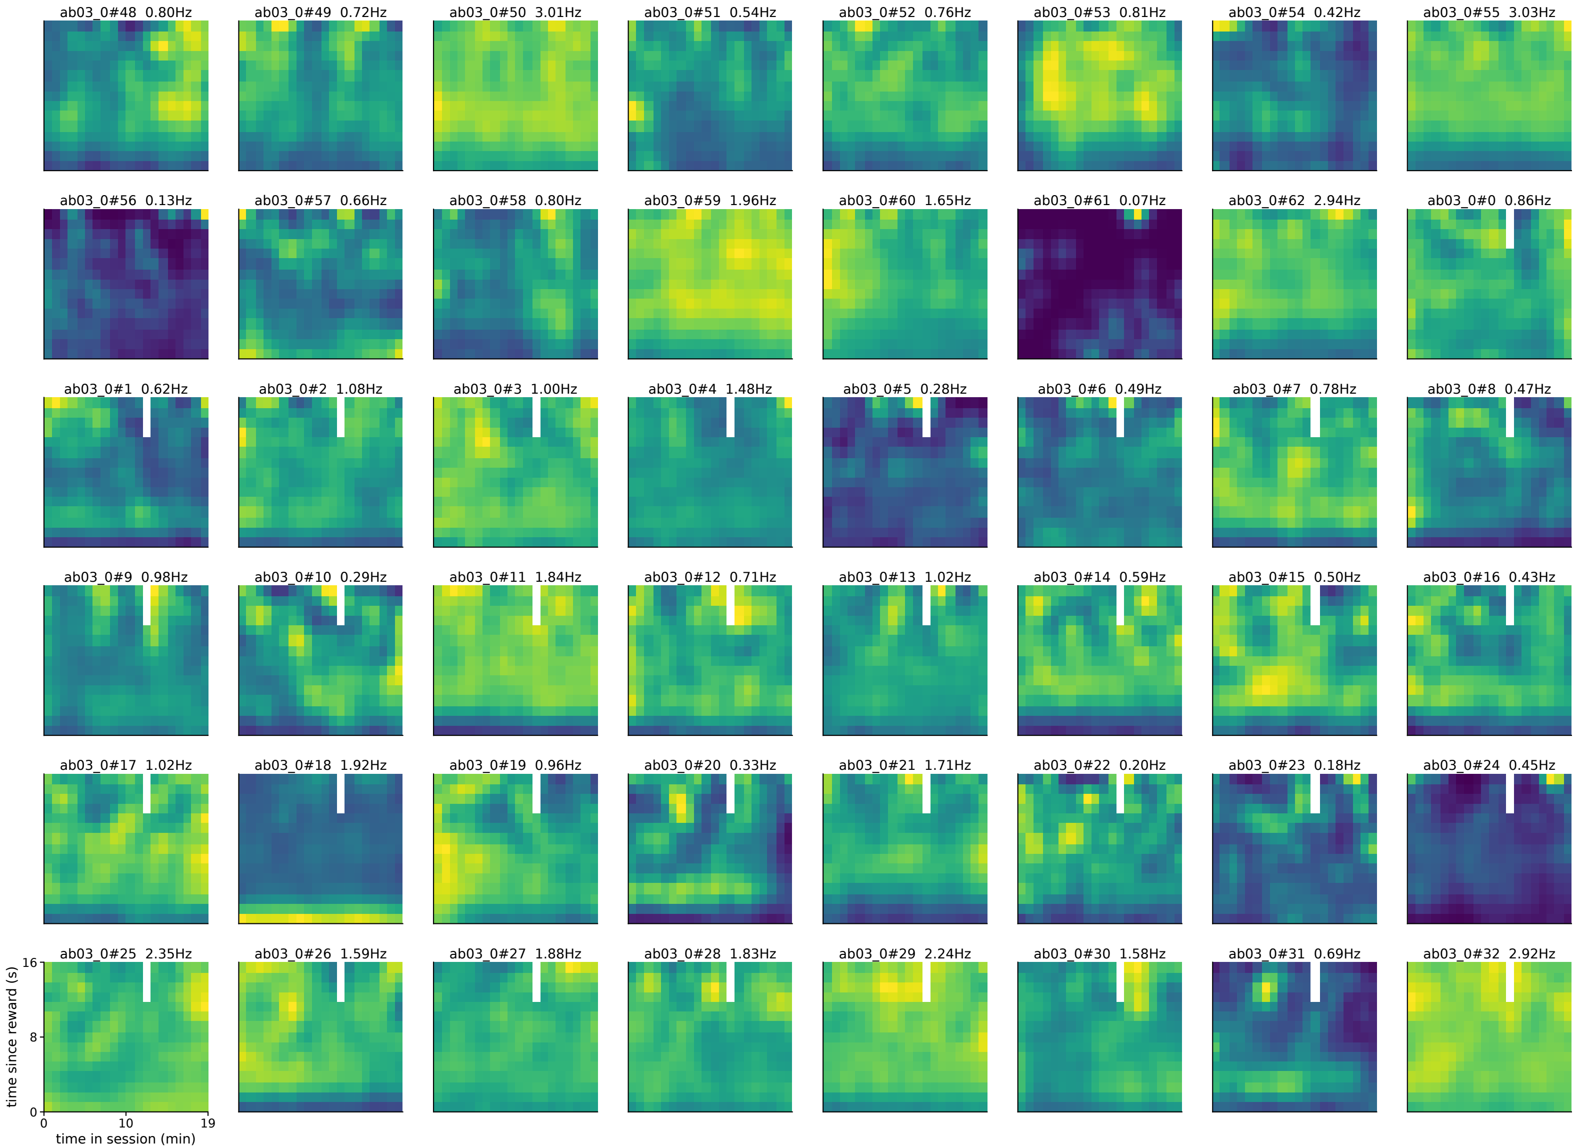
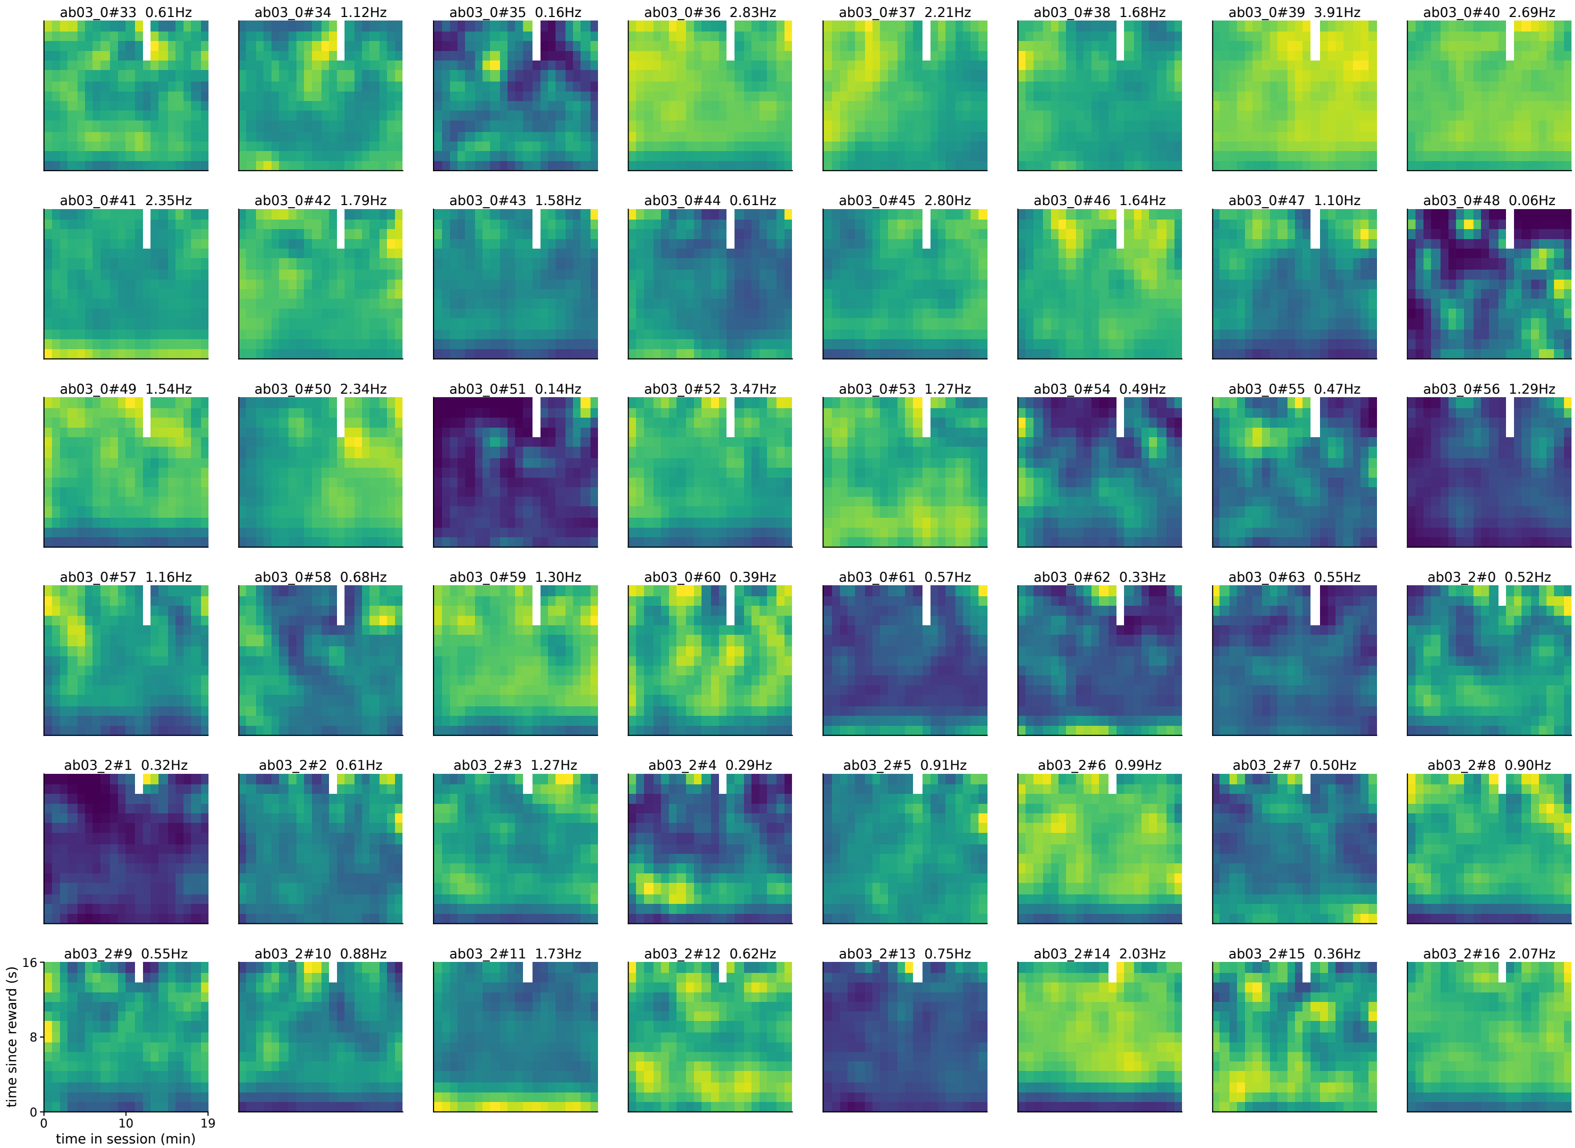
absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 0-47 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise



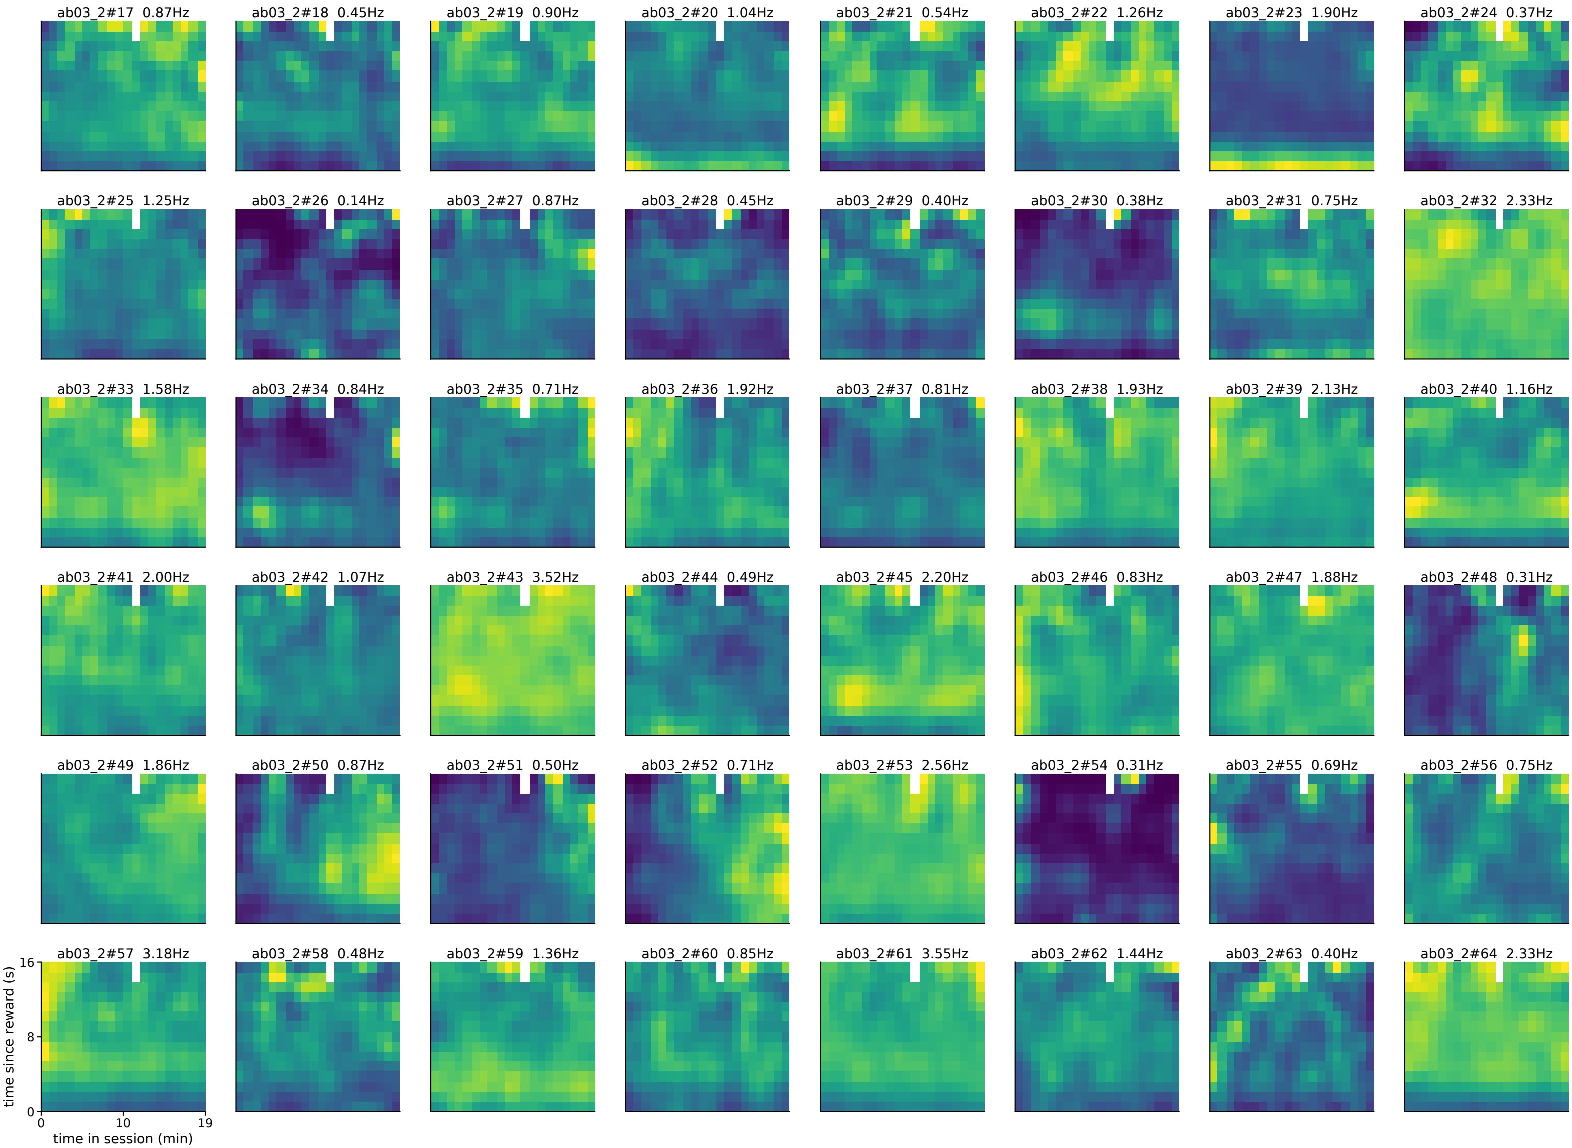
absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 48-95 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise



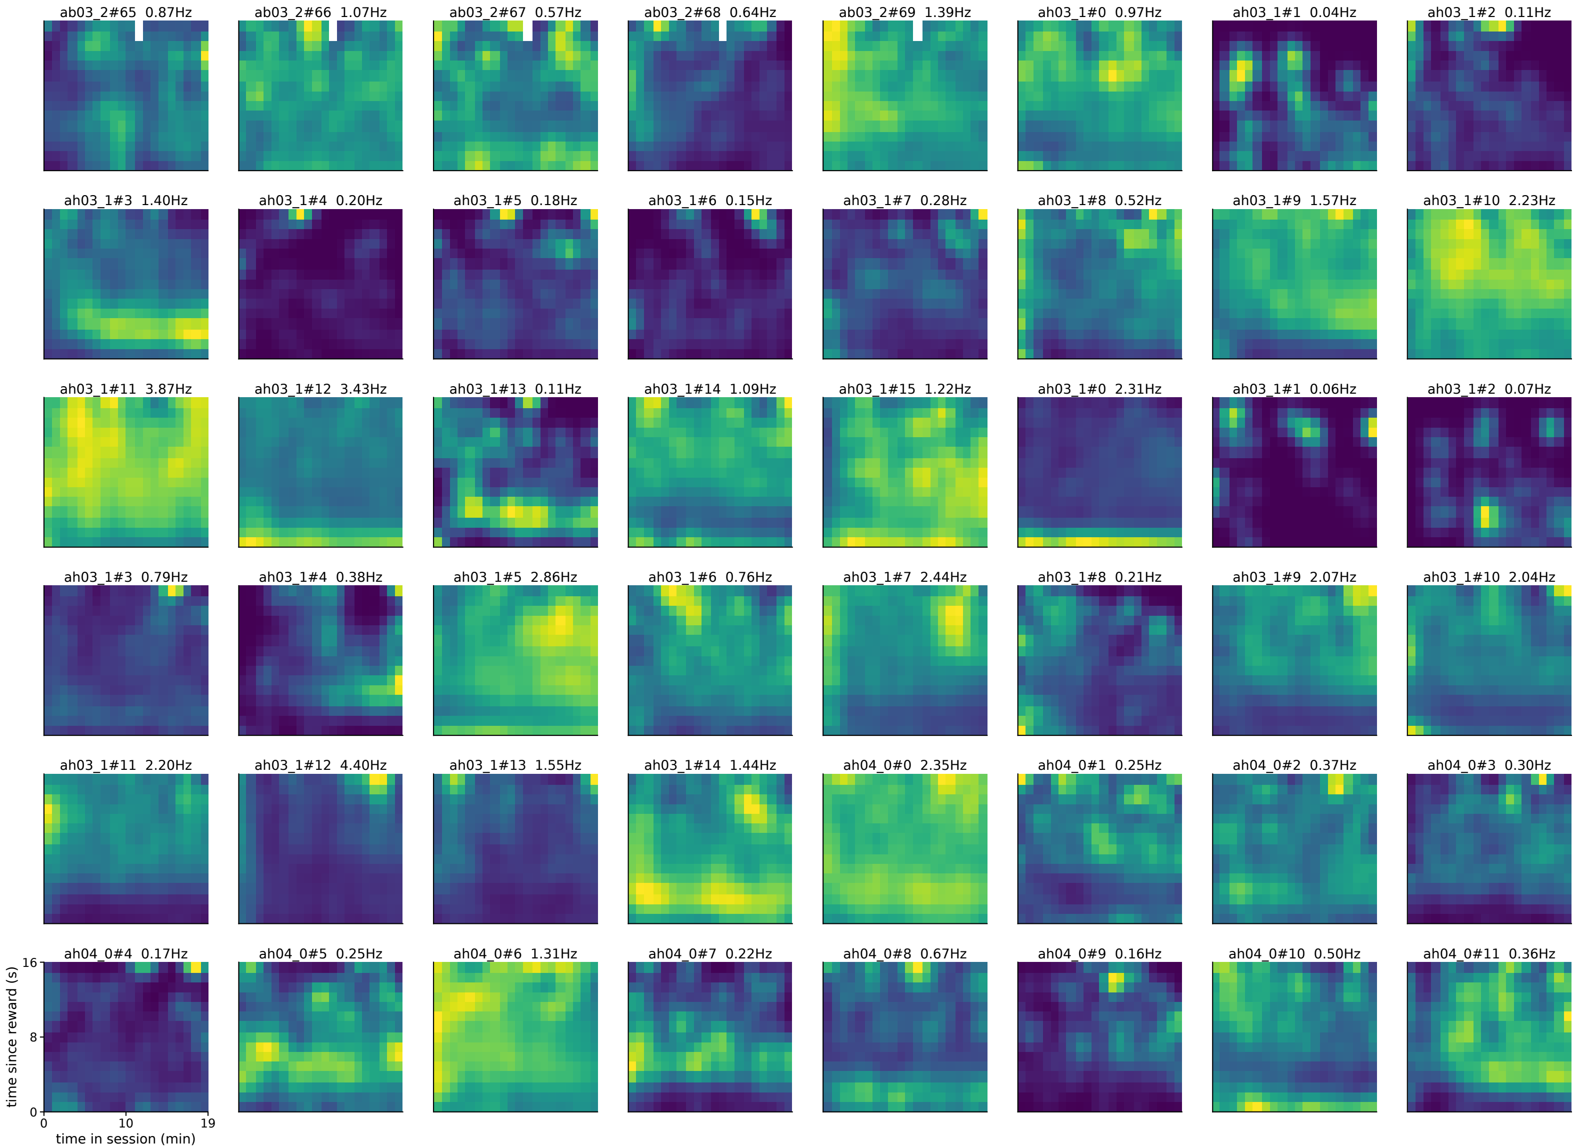
absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 96-143 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise



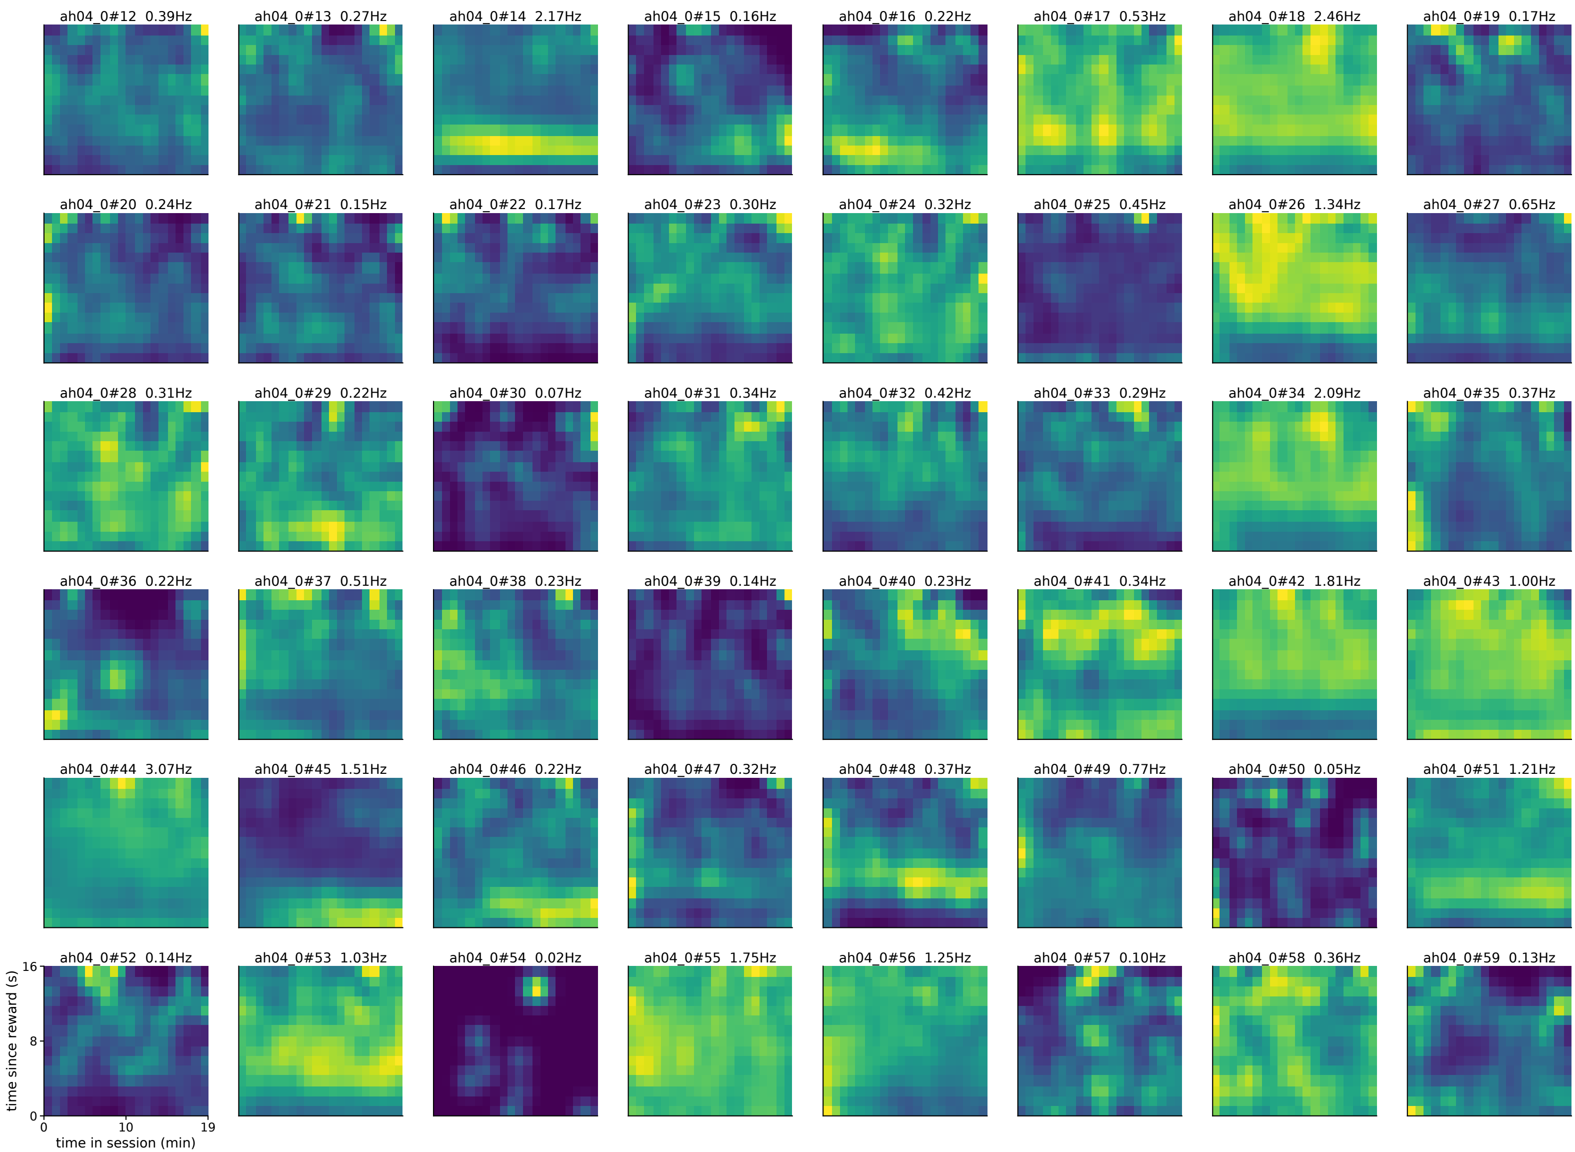
absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 144-191 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise

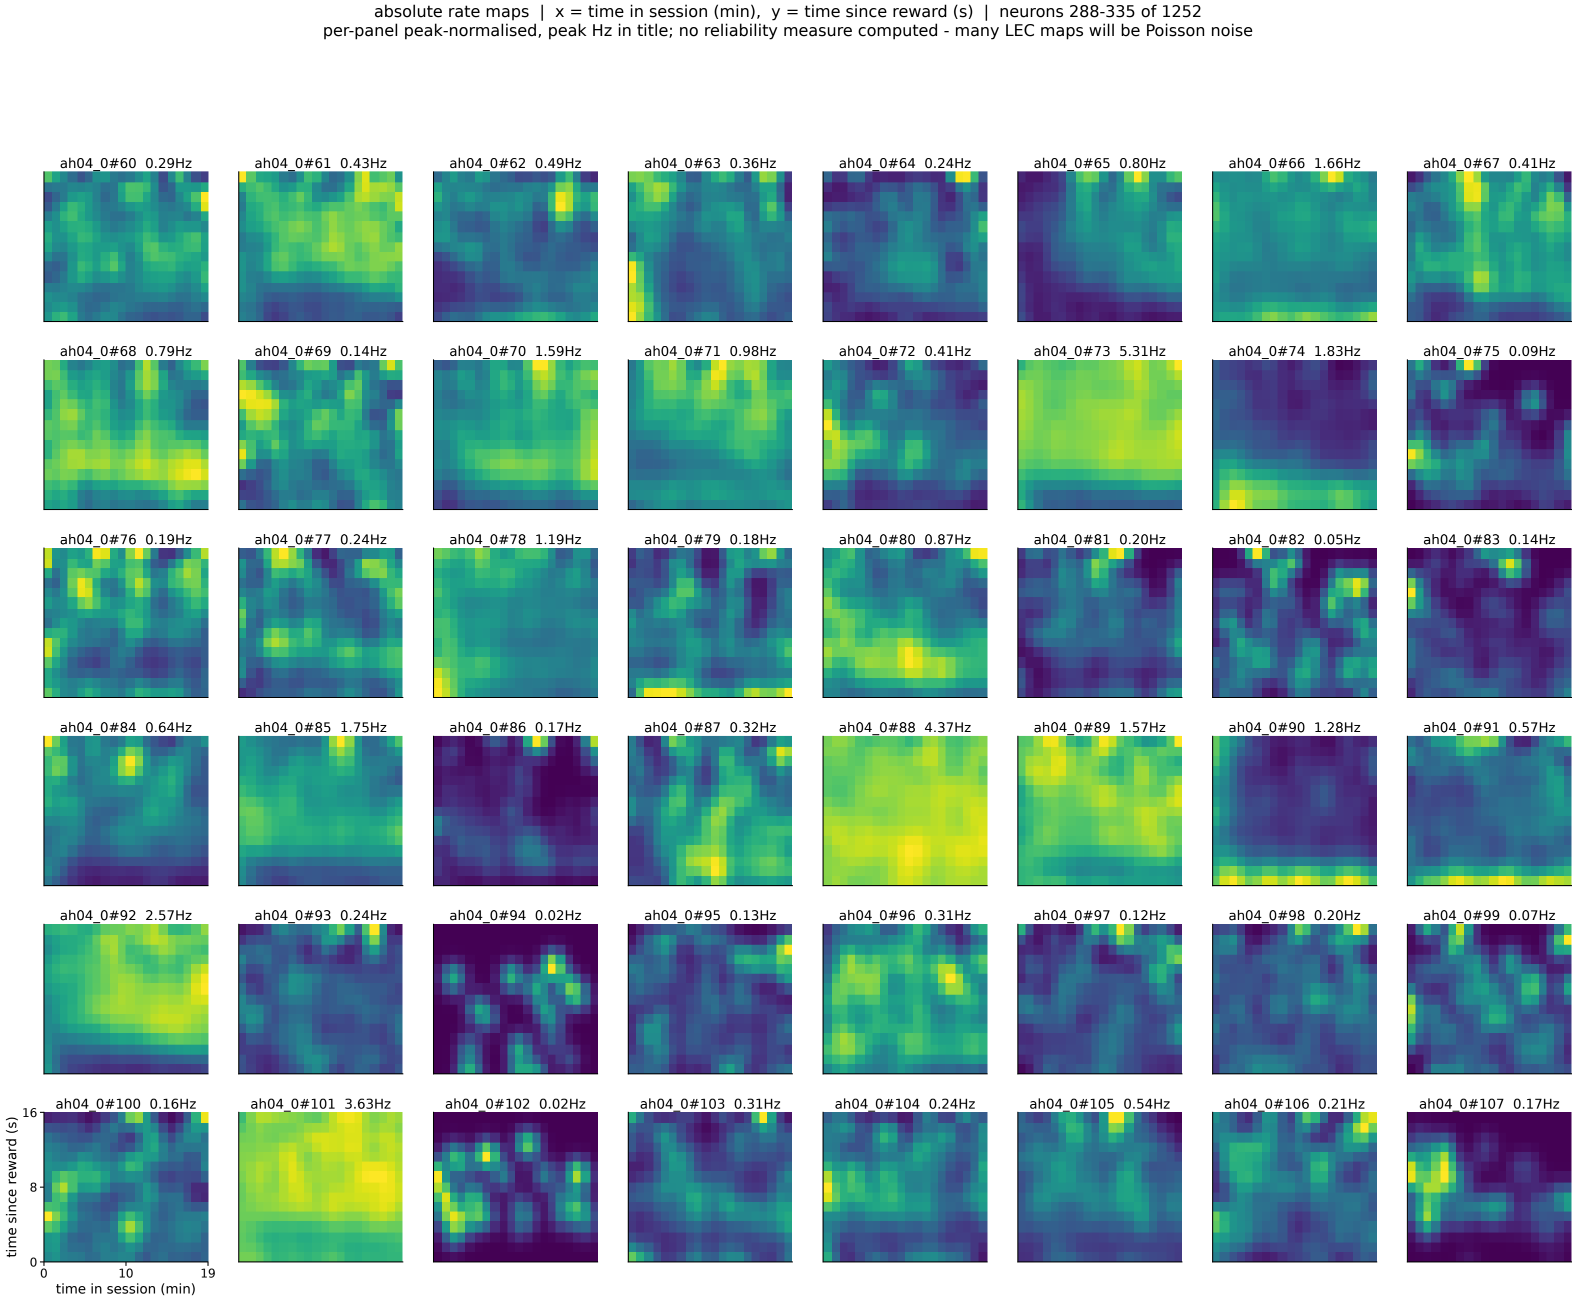


absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 192-239 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise



absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 240-287 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise





absolute rate maps | x = time in session (min), y = time since reward (s) | neurons 288-335 of 1252
per-panel peak-normalised, peak Hz in title; no reliability measure computed - many LEC maps will be Poisson noise
